PATENT INFORMATION SYSTEM

&

RAJIV GANDHI NATIONAL INSTITUTE OF INTELECTUAL PROPERTY MANAGEMENT

A) PATENT INFORMATION SYSTEM :-

Patent Information:

Publication of patent documents is an essential feature of the patenting process in every country. Patent documents set out the full technical details of an invention. About 60 million patent documents have been published so far and each year nearly one million new ones appear. This makes patent documents the largest single source of technological information available anywhere. Furthermore, the vast bulk of this information cannot be obtained from any other source.

Patent Information provides guidance for filling new patent applications, utilizing patented inventions, deciding strategy for R & D and Industries, licensing /assigning of patents, etc. Patents also provide useful information, which gives an insight new market opportunities.

In today’s knowledge-based economy, patents are regarded as a wealth-creator. A strong patent portfolio is an asset to any organization/industry. Patent information should therefore form an essential part of any organization to enhance their patent portfolio.

Who can benefit from Patent Information? And how?

A. Researcher/Inventor/R & D Organization / University.
   - To avoid duplication of research
   - To access state of the art before initiating a Research Project
   - To find ready solution to technical problems in ongoing research
   - To keep up-to-date knowledge about the technology.

B. Industry
   - To improve existing technology for producing newer/better/cheaper products.
   - To find a ready solution to technological problems
   - To assess the state of the art before initiating the project
   - To identify and evaluate suitable technologies for adaptation/transfer

C. Business Enterprises.

- To identify new products for marketing, licensing or distribution
- To locate patent owners and identify competitors
- To avoid possible infringement problems
- To locate areas of investment

D. Consultants and Planners
- To assess a technology for viability
- To undertake technology forecasting by identifying the trend of inventions in a given technology field
- To advise industry/R & D organization/financial institutions on issues relating to the technology.

E. Financial Institutions.
- To assess a technology/research project for financial support
- To monitor viability and progress of aided projects.

- To ascertain patentability and other aspects like opposition, infringement, revocation and other proceedings under the Patent Law.
- To provide professional assistance to the Inventors/Applicants.

Where to get access to Patent Information?

Introduction

Intellectual Property Rights like Patents, Designs, Trademarks and Geographical Indications play an important role in the International Trade and Commerce and also in Industrial, economical and social development of a nation. India has been a signatory to many international agreements, which have been evolved for regulating grant and exploitation of Intellectual Property Rights. As a result, IPR-related activities have been on continuous increase in our country for the last several years.

The laws governing intellectual property rights are necessarily technical-legal matters. Many complex issues are involved in creation, utilization and meaningful exploitation of Intellectual Property Rights. As such, there is a need for an effective means for improvement in understanding of IPRs and dissemination of proper knowledge, more so in our country, where awareness about IPRs, especially Patents, is highly insufficient.

The Rajiv Gandhi National Institute of Intellectual Property Management (RGNIIPM) has been set up at Patent Information System, Nagpur by Ministry of Commerce & Industry, Government of India to address these issues. It is a National Training Center, the only one of its kind in our Country, created for catering to the need of providing quality Training and Education in IPRs to various users-groups so as to enable them to deal effectively with Intellectual Property Rights and benefit from them.

Training Activities at RGNIIPM

Rajiv Gandhi National Institute of Intellectual Property Management conducts number of training programmes on Intellectual Property Rights, specially Patents, Designs Trademarks and Geographical Indications, keeping in view the requirements of actual and potential users of Patents and other IPR systems.
